Visual Paradigm ERD Notation Legend
Primary Key (PK): Uniquely identifies table records (gold key icon).
Foreign Key (FK): References PK in related table (green arrow + italic).
Column: Scalar column attributes with native RDBMS data types.
N Nullable Flag [N]: Attribute permits NULL; absent on mandatory fields.
Solid Line: Identifying relationship (junction tables & subtypes).
Dashed Line: Non-identifying relationship (independent PKs).
Cardinality: Crossbar (|) = One · Circle + Crow's Foot (o{) = Many
